

RAHIL WIJEYESEKERA

+1 672-381-1883 | rahilwijeyesekera@uvic.ca | linkedin.com/in/rahil-wijeyesekera | github.com/Rahilyw

EDUCATION

B.Sc. Computer Science, University of Victoria | BC, Canada Sep 2023 – Dec 2027 (expected)

Relevant coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Database Systems, Computer Architecture.

National University of Singapore | International Exchange (Computer Science) Jan – May 2025

PROJECTS

LEGO Set Browser — Python, Flask, Azure (Container Apps, Cosmos DB, Functions), Docker, Bicep

- Built a full-stack web app for browsing, searching, and filtering thousands of LEGO sets, served as a containerized Flask app on Azure Container Apps with pagination, full-text search, and theme/year/part-count filtering

Lost-in-SF | Autonomous AI Quest Agent | Python - Microsoft Agent Framework - Azure OpenAI - MCP

- Built an AI agent that completes a live city quest game via specialist sub-agents (A2A) and RAG over Azure AI Search, coordinated through Model Context Protocol (MCP).
- Added cross-session memory and logging middleware, recording every model call and tool use.

Review Moderation Agent | Cloud-Hosted Content Classifier | Microsoft Foundry - Agent Framework

- Deployed a containerized agent on Microsoft Foundry that classifies product reviews as SAFE / NEEDS_REVIEW / UNSAFE and routes each to approve, block, or human review by confidence.

FAQ Assistant | RAG Knowledge Bot | Python - Azure SQL - Vector Search - GPT-4o - MCP

- Developed a RAG-powered bot using GPT-4o and Azure SQL vector search; eliminated hallucinations by grounding all responses exclusively in retrieved FAQ context, with zero out-of-scope answers in testing.

EXPERIENCE

Technical Co-founder | Serendira | Remote (San Francisco, USA) Dec 2025 – Present

- Lead all engineering for a talent platform connecting enterprises with remote professionals across Asia.
- Shipped the platform end-to-end as a developer: design, build, deployment, support.
- Designing an AI recommendation system matching candidates to clients on skills, culture fit, and goals.

Business Design Intern | Innovation Quotient | Sri Lanka Jun 2024 – Sep 2024

- Conducted market and competitor research for enterprise clients (DFCC Bank, SLT-Mobitel, UFS Auto), turning it into data-driven growth recommendations presented to and approved by client boards.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C, SQL

AI / ML & LLMs: RAG, Vector search, Recommender systems, MCP, multi-agent (A2A) systems, Agent Framework, Microsoft Foundry, Azure OpenAI (GPT-4o), Claude API, Ollama

Web & Cloud: React, Flask, Firebase, Docker, CI/CD, Azure (Container Apps, Functions, AI Search)

Databases: Azure SQL, Cloud Firestore(NoSQL), Cosmos DB (NoSQL), Vector databases

Systems & Networking: Linux, POSIX threads, Shell scripting, TCP/IP, Raw sockets, TLS/SSL, Git

ACHIEVEMENTS & LEADERSHIP

- UVEC Hackathon 2025 — 3rd Place ([SecureUSB](#)).
- Director of Sport, UVic Engineering & Computer Science Society (ECSS).
